A

GENERAL DIRECTORY

AND

BUSINESS GUIDE

OF THE

PRINCIPAL TOWNS IN THE UPPER COUNTRY,

EMBRACING A PORTION OF

CALIFORNIA;

TOGETHER WITH

MINING AND STATISTICAL INFORMATION CONCERNING IDAHO TERRITORY,

AND A

MAP OF IDAHO AND MONTANA.

COMPILED BY G. OWENS.

SAN FRANCISCO:
PUBLISHED BY A. GENSOUL, PACIFIC MAP DEPOT,
511 MONTGOMERY STREET.
Towne & Bacon, Printers, 536 Clay Street.
1866.

OSBORN & SESSIONS,

Purchasing and Commission Agents,

611 MOMTGOMERY, cor. MERCHANT,

SAN FRANCISCO.

HAVING had extensive experience, both in Wholesale and Retail General Merchandise business, we feel confident that to Country Merchants desiring a Resident Agent, or to an occasional purchaser, we can offer superior inducements. Particular attention given to COLLECTIONS, the purchase and sale of *Legal Tender Notes, Drafts, Stamps*, etc., or other transactions requiring the services of EXPERIENCED and RELIABLE AGENTS.

Purchases will be made for CASH ONLY, except in cases of special agreement to the contrary, when city reference will be required. *Preference given to houses from whom former purchases have been made, if desired.* The interest of purchasers will be carefully and strictly consulted in every instance. Charges reasonable.

G. W. OSBORN, Formerly with Canfield, Pierson & Co., San Francisco.

E. C. SESSIONS, Formerly with C. R. Goodwin & Co., San Francisco, and Bradbury & Wade, Jacksonville, Oregon.

Refer to—FLINT, PEABODY & CO., G. W. BELL, S. A. WOOD, L. B. BENCHLEY & CO., CLARK & PERKINS, San Francisco; A. C. GIBBS & CO., Portland.

ENTERED according to Act of Congress, in the year of our Lord, 1866, by

G. OWENS,

In the Clerk's Office of the District Court of the United States, in and for the Northern District of the State of California.

JOHN R. SIMS,

SUCCESSOR TO

SIMS & FRAZER,

Oregon St., bet. Washington and Davis and Front & Jackson,

San Francisco.

MANUFACTURERS OF

Fire-Proof Doors and Shutters, Bank Vaults, Gratings,

CEMETERY RAILINGS, ETC.

All orders from the Interior, Oregon, Idaho and Washington Territories, Vancouver's Island, British Columbia, or any place on the Pacific Coast, attended to with promptness and dispatch.

Mr. SIMS appreciates the past liberal patronage of his friends, and trusts he may continue to merit it in the future. For the information of strangers, he would say, that he feels confident that his experience in his particular calling is surpassed by none on this Coast, which his superior work, sent to almost every town in California, Oregon, also Victoria and the Sandwich Islands, and to be seen on some of the best buildings in San Francisco, fully attests.

A large assortment of **Second-Hand Shutters** on hand for sale at low rates.

Mr. E. M. BURTON, of ***Portland,*** is authorized to contract for **Iron Work,** in my name.

WHITE BLUFFS, WASHINGTON TER.

White Bluffs is located on the east side of the Columbia River, about twenty-five miles below Priest Rapids. It is favorably situated for trade, and has facilities for communication with Colville and Fort O'Kanagan at the north, and the Blackfoot and Montana mines at the east. A line of stages will run *via* Pend d'Oreille Lake, connecting there with steamer, now in course of building, and is said will be ready to run by the middle of March. For a short time, a saddle train will connect, about sixty miles on the above road, between Pend d'Oreille Lake and White Bluffs. General Merchandise; Booth & Nevison.

POPULATION OF COUNTIES.

Idaho	955
Shoshone	276
Nez Perce	1,403
Boise and Ada	15,158
Alturas	1,374
Owyhee	1,735
Oneida	3,730
New Counties Unorganized.	
Kootenai	37
Lahtoh	43
Estimated, but not enumerated	600
Total	25,012

POPULATION OF TOWNS.

*Ada County.**	
Boise City	1,658
*Boise County.**	
Idaho City	7,000
Placerville	2,500
Centerville and Pioneer City	4,000

*The population of towns in Ada and Boise counties in the above statement, embrace an area of several miles outside of their town limits.

The following estimated figures will be found about correct.

Ada County.

Boise City	1,400

Alturas County.

Rocky Bar and Clifden	600
Red Warrior	150

Boise County.

Idaho City and Buena Vista Bar	3,000
Placerville	700
Pioneer City	750
Centerville	700

Idaho County.

Warren's Diggings	521
Florence	254

Nez Perce County.

Lewiston	225
Elk City	219

STEAMBOATS.

The steamboat *Colonel Wright*, commanded by Captain L. White, was the first steamboat that ascended the Columbia River. It made its first trip above the Dalles as far as Wallula. Captain White also commanded the first steamboat on the Willamette River. The first steamboat on the Snake River, ascended Clearwater River, twenty-five miles from its mouth, in 1861. In consequence of shallowness of the water, the boats ascend to where Lewiston now stands. Snake River has been ascended about fifteen miles above Lewiston. It is navigable to Lewiston about three months in the year.

Twenty-seven miles above Ft. Colville, the Upper Columbia River is said to be navigable for about three hundred and fifty miles. A steamboat is running from the above point to the mines, across the line in British Columbia. Also one is being built near the mouth of Boise River, which will run from Old's Ferry up Snake River to the head of steamboat navigation.

MINING DEPARTMENT.

THE NORTH COUNTRY.

The Upper Country, popularly so-called, embraces a very large area of territory lying between the parallels of 42° and 54° north latitude, and the meridians of 110° and 120° west longitude from Greenwich—or 33° and 43° west longitude from Washington. It comprises within its limits, Idaho Territory, part of Washington Territory, part of Montana Territory, that part of Oregon east of the meridian of 43°, and that part of British Columbia lying between the meridians of 37° and 41° west longitude.

IDAHO TERRITORY.

According to Act of Congress, approved March 3d, 1863, the Territory of Idaho (Idaho signifying "Gem of the Mountains") was created from those portions of Washington, Dakota, and Nebraska Territories, lying between the 104th and 117th meridians of west longitude. Its present boundaries extend from the meridian of 117°, where it connects with the 49th parallel; thence along said parallel to the 116th meridian; thence running due south to the Bitter Root Mountains, following the course of the Rocky Mountains to the 110th meridian; thence due south on said meridian to the 42d parallel, and along said parallel to the 117th meridian; thence running due north to the mouth of the Owyhee River; thence following down the channel of the Snake River to a point opposite the mouth of the Clear Water River; thence following the 117th meridian to the 49th parallel.

Idaho, till within a few short years, was comparatively unknown. The Indians, who inhabited the country before it was settled by white men, were hostile to those who attempted to explore and settle within its borders. Although it was traversed by hardy trappers, who penetrated the country in pursuit of their perilous calling, they added but little to the general stock of information which we possess. The

country remained in this condition till 1852, when gold was discovered by a French Canadian on the banks of the Pen D'Oreille River.

An interval of eight years elapsed from the first discovery of gold till the finding of richer and more extensive diggings at Oro Fino, in the summer of 1860, by a party of eleven men, where twenty-five persons wintered without intercourse with the outside world. This discovery seemed to open the way to the quick development of Idaho, for soon afterward some miners went out from Oro Fino on a prospecting expedition, and found good mines at Elk City. From one thousand five hundred to two thousand persons started for the new gold region in the spring of 1861.

On the discovery of gold east of Snake River, a town called Lewiston was established at the confluence of the Snake and Clear Water rivers, then lying within the limits of the Nez Perces Reservation, and became immediately the depôt for supplying the mineral regions east of it. An important treaty between the General Government and the Nez Perces Indians was concluded at the Council Ground, near Fort Lapwai, June 9th, 1863. The negotiations were conducted by three Commissioners, Messrs. Hale, Hutchins, and Howe, Indian agents of Washington Territory, on the part of the United States, and Lawyer, Head Chief, assisted by fifty subordinate chiefs, on the part of the Indians; it resulted in their relinquishing about nine thousand square miles of land—the balance, consisting of one thousand square miles, was set apart for the tribe, each adult member of which being entitled to twenty acres of land, and well stocked.

During the fall of 1861, very rich placer mines were found on the tributaries of Salmon River at Florence. The reports of the discovery created considerable excitement, and a large number of persons left the neighboring camps, bound for Florence. The following year, there was a rush from the Pacific States, and also from the East. During the same year a party went out from Florence, and discovered Warren's Diggings, which is considered a good mining camp.

The next and most important discovery of placer mines was made by a party of twelve men from Walla Walla. This party started on a prospecting expedition, and at first went on the south side of Snake River, as far as Sinker Creek, a tributary of the former, which they then crossed and went up Boise River into the mountains, by way of Moore's Creek. In the month of August they found gold in Grimes' Creek, two miles below where Centerville now stands. They continued prospecting toward the head of the creek, about six miles above Pioneer City, where Mr. Grimes, one of the party, was killed by an Indian. After this sad occurrence, deeming it unsafe to proceed fur-

ther, they concluded to return to Walla Walla, where they succeeded in raising a party of fifty-four men, who returned to the mining camp, now known as Pioneer City, arriving there October 7th. Ten days after their arrival, thirty-four men went back for provisions, and the rest improved the time while they were gone in building a stockade, as a protection from the Indians. The thirty-four men, while on their way back to Walla Walla, were passed by other parties following their trail into Boise Basin. It is supposed that two or three thousand men went into Boise Basin by the first of January, 1863. There was no mining of importance done till spring, on account of the snow, but principally prospecting. That year a large number of persons left the Pacific States, bound for the new El Dorado.

Boise Basin is the largest placer mining region yet discovered in Idaho Territory. There are some rich and valuable quartz lodes in the basin, and since a few quartz mills have been in operation, a feeling of confidence in their richness and permanence have pervaded the public mind. Boise Basin is well timbered and watered, offering excellent facilities for the development of its mineral resources. The climate is mild, dry, and serene, during the summer and fall; it is cold in the winter, but generally equable and healthy all the year round. The placer mines are rich and extensive, and numerous gold and silver-bearing quartz lodes are found within a short distance of town. Warm springs are found about two miles south-west of Idaho, and are much resorted to during the summer and fall.

Silver Hill District is situated in Boise County, on the divide between the waters of the Payette and Crooked rivers—the latter a tributary of the North Fork of Boise River. The district is well timbered and watered—offering good facilities for milling and mining purposes.

The placer and quartz mines of Owyhee County are situated in the south-western part of Idaho, and were discovered in the spring of 1863, by Mr. Jordan and a party who went out from Boise Basin on a prospecting expedition. Finding good placer mines on Jordan Creek, and very rich silver-bearing quartz lodes in the vicinity of Silver City, they commenced work on some of them in October of the same year.

The Snake Indians inhabiting the region of country lying north and south of Snake River, have often manifested a hostile disposition against the whites; and where they have had a chance to commit depredations, the settler and prospector have suffered either in loss of life or property, and sometimes both. As in most all Indian countries, a state of peace is not likely to continue a long time, nor a feeling of personal security to prevail. About one year after the discovery of gold on Jordan Creek, the Indians commenced hostilities by killing two men

and stealing stock. So soon as the fact was known, Mr. Jordan, accompanied by about twenty men, started in pursuit of the Indians, overtaking them on the head waters of the Owyhee River, nearly sixty miles south of Boonville. They were supposed to number three hundred strong. Jordan and his party attacked them from an eminence overlooking them; but being overpowered by superior numbers, they were compelled to seek safety by flight, leaving Jordan dead on the field. The Indians pursued them nearly eight miles. A party of one hundred strong went back to the place where Jordan was killed, and found his body horribly mutilated. The party, however, succeeded in overtaking the Indians, completely routing them, and killing about thirty or forty of their number. Since then rapid progress has been made in the development of the mineral resources of the country. Mills have been erected; the quartz has paid well; and a general feeling of confidence prevails among the miners.

The surface of Owyhee County is very uneven and mountainous. The climate is mild during the summer, but severe and subject to storms in the winter.

Alturas County lies east of Boise and Ada counties. Silver-bearing quartz ledges were discovered at Rocky Bar about the same time as in Owyhee County. Placer diggings have been discovered on Feather River, and gold mines on the head waters of Middle Boise River, on Yuba River and Grouse Creek; and valuable quartz lodes have been found, which bid fair to support a considerable mining population Alturas County is well timbered and watered for milling and mining purposes.

Volcano is the name of a new quartz district in Alturas County. It was discovered March 12th, 1864, by a party called the Pioneer Company, consisting of five men. Placer mines have been found on the south slope of Volcano Mountains, north of Snake River, and also in Cottonwood Canyon, which give employment to a few miners. There is plenty of water for milling and mining purposes in Volcano District; but not much timber in the immediate vicinity of the quartz ledges located in Spring Valley.

East District is about thirty-five miles north-east of Big Camas Prairie; it was discovered in 1864. Also a new discovery near Yuba District, during the same year; both of the above are quartz districts.

Boise Valley is in Ada County. The soil is of course very various. Those portions not having facilities for irrigation are dry, but on the river bottoms it is excellent. The climate is mild during a part of the year, but somewhat cold in the winter.

The discoveries of placer and quartz mines which have been made

in Idaho within the last five years, have developed it enough to prove its richness in minerals. A large area of territory, hitherto unexplored, is believed to be rich in auriferous deposits and gold and silver-bearing quartz lodes, which will, at no distant period, support a large mining population.

The country lying between Umatilla City and Idaho contains mountains of some magnitude. The principal and most noticeable ranges are the Blue Mountains and the mountains of Boise County. It embraces some fertile tracts—that of Grande Ronde Valley containing an area of about four hundred square miles.

Grande Ronde Valley abounds in fine scenery. The climate is somewhat unhealthy, and tempestuous winds prevail in the valley, part of the year, and are especially disagreeable during the winter.

The bottoms of Boise and Payette valleys are productive to some extent. The region lying between Grande Ronde and Payette valleys forms a rugged tract, and is generally destitute of timber.

TOWNS AND CITIES IN IDAHO TERRITORY.

ADA COUNTY.

Boise City is in 43° 34′ north latitude; it is situated in Boise Valley, on the north side of Boise River. It is centrally located, being easy of access by roads which branch from here to the placer and quartz mines in Boise, Owyhee, and Alturas counties. The above city is the capital of Idaho Territory, and the county seat of Ada County.

ALTURAS COUNTY.

Rocky Bar is located at the confluence of Bear and Steel creeks, and is the county seat of Alturas County.

Clifden is about a half a mile from Rocky Bar.

Red Warrior is about one mile and a half from Rocky Bar. The above three towns are sustained by the gold quartz mines in the vicinity.

Happy Camp is about four miles from Rocky Bar, and is in the vicinity of the principal placer mines in Alturas County.

Volcano is situated at the south-west end of Big Camas Prairie.

BOISE COUNTY.

Idaho City is in 43° 46′ north latitude, and situated at the confluence of Elk and Moore's creeks; it is the county seat of Boise County, and the largest town in Idaho Territory.

Pioneer City was the first town settled in Boise Bason; it is located on the east side of Grimes' Creek, and is a thriving mining camp.

Centerville lies between Placerville and Idaho City.

Placerville is about five miles north-west of Centerville.

Banner is thirty miles from Idaho City—is in the vicinity of quartz mines.

IDAHO COUNTY.

Florence is the county seat. Warren, Richmond, Millersburg, and Washington, are small mining camps.

NEZ PERCES COUNTY.

Lewiston is the county seat of the above county; it is located at the confluence of the Snake and Clearwater rivers.

ONEIDA COUNTY.

Soda Springs, county seat.

OWYHEE COUNTY.

Ruby City is the county seat of Owyhee County, and situated on the south side of Jordan Creek.

Silver City is on the south side of Jordan Creek, about three-fourths of a mile from Ruby City. Silver and Ruby cities are sustained principally by the silver quartz mines in the vicinity.

Boonville was the first town settled in Owyhee County, and is located on the north side of Jordan Creek.

Silver and Ruby cities are sustained principally by the silver quartz mines in the vicinity.

SHOSHONE COUNTY.

Pierce City is situated at the mouth of Canal Gulch; it is the county seat of Shoshone County.

Oro Fino is located at the junction of Ooro Fino and Rhodes' creeks.

ALTURAS COUNTY.

QUARTZ MILLS.

Bledsoe Mill is in Yuba District.

Defrees' Mill.—W. R. Defrees, Superintendent.

It is located at Volcano, Volcano District, south end of Big Camas Prairie.

Harris & Benson's Mill.—Harris & Benson, proprietors.

The above mill is on Red Warrior Creek; has ten stamps, and been in operation a short time.

Idaho Mill.—The Idaho Mill is situated on the north side of Bear Creek; it has twelve stamps and room for four more. It is a steam mill, and was made at Gates' Foundery, Chicago, Illinois. The machinery was ordered in 1863, and in operation on the third day of January, 1865. Mill crushes rock taken from the Idaho Ledge.

New York and Idaho Gold Mining Company.— —— ——, Superintendent.

The above mill is located on Red Warrior Creek; has ten stamps, two batteries, five of Varney's Pans, and two settlers. Engine, forty-horse power. The mill has been in operation a short time. Machinery was made at the Pacific Iron Works, San Francisco. The building is neat and substantial.

Pittsburg and Idaho Gold and Silver Mining Company.—Major Spear, Agent, P. S. McCarty, Superintendent.

The above mill is situated on Elk Creek; runs ten stamps, two batteries, two of Moore's Pans and Amalgamators. Blake's Crusher is used, and three Chili mills.

Victor Gold and Silver Mining Company.—F. O. Nelson, Superintendent, Wm. P. Dean Secretary.

Victor Mill is located on Red Warrior Creek; has ten stamps weighing six hundred pounds each, three batteries, and two Moore's Grinders, and Amalgamators. Engine, thirty-six-horse power. Mill crushes rock taken from the New York Ledge. Machinery was made by Hinckley & Co., San Francisco.

Waddingham Gold and Silver Mining Company, formerly Col. O'Neil's mill. Wilson Waddingham, Superintendent.

The above mill is located on Bear Creek; has ten stamps weighing six hundred and ten pounds each, drop nine inches, and sixty times a minute; two Wheeler's Pans, and one Hungerford's Separator, and two floating batteries. Engine, fourteen-horse power. Mill crushes rock taken from the Ada Elmore and Confederate Star ledges. Machinery was made at Miners' Foundry, San Francisco. The building is substantially made, and the interior is well adapted for milling purposes. First run, rock taken from the Ada Elmore Ledge, five days' crushing, $2,300.

WADDINGHAM GOLD AND SILVER MINING COMPANY.—Wilson Waddingham, Superintendent.

The above mill is situated at Clifden; has forty stamps weighing six hundred and fifty pounds each. Engine, eighty-horse power. This mill is not yet in operation.

SAW MILL.

William H. Molthrup, agent for Ripley & Co.

It is located on Red Warrior Creek, about half a mile from town.

BEAR CREEK DISTRICT.*

LEDGES.

ADA ELMORE (Discovery).—Number of feet, twelve hundred.

The above ledge is located on Bear Creek; has two shafts, one is fifty feet deep, the other, sixteen feet. Width of ledge, three feet, showing good quartz.

ALTURAS (Discovery).—Alturas Lode is situated in Blake's Gulch; tunnel is one hundred and forty feet in length, and has smooth granite walls.

AURORA (Discovery).—Fourteen hundred feet. The Aurora is nearly three hundred feet from Bear Creek, has a tunnel about thirty feet, following the course of the ledge, which is three feet wide at the entrance, and two feet at the end of tunnel. Good-looking rock, and about twenty-five tons at the mouth of tunnel.

AUTOCRAT.—The above lode is about four miles from Rocky Bar. Length of tunnel, forty feet; ledge is about three feet wide, and has granite walls.

BUCKEYE.—The above ledge is near Ophir Gulch, three-fourths of a mile from Elk Creek and mill. The shaft is twelve feet deep, ledge is fifteen inches wide, and has granite walls.

CALIFORNIA (Discovery) is located on Silver Mountain, about two

---

* Bear Creek District is so well timbered and watered, that it is unnecessary to repeat the fact in connection with a description of its numerous ledges. The same may be said of Red Warrior District. The ledges in both of the above districts, mostly run north-east and south-west, and dip north.

miles north-east from Rocky Bar; open cut about twenty feet, showing a ledge three feet wide; has smooth granite walls. There is plenty of space for dumping purposes.

CHANCY.—The Chancy is situated on Idaho Hill about one-quarter of a mile from Bear Creek. Kind of work done, an open cut eight feet.

COLORADO is one mile from Rocky Bar, has an open cut showing the ledge two feet wide. Has space for dumping.

CONFEDERATE STAR.—The above ledge is located north of Bear Creek; has four tunnels, one hundred, two hundred and fifty, one hundred and fifty, and three hundred feet, respectively. The first, or upper tunnel is one hundred feet long; the second is two hundred and fifty feet in length, and has four shutes; the first is thirty feet from the entrance; second, sixty; third, ninety; fourth, about one hundred and fifty feet; the latter extends upward on the ledge eighty or ninety feet; the first, second, and third, go to the surface. The tunnels are about the following distances apart; the second tunnel is about forty feet below the first; the third, nearly the same distance below the second; fourth is about one hundred feet below the third tunnel. The width of ledge varies from two to seven feet; the part of ledge seven feet wide, extends about sixty feet. The quartz is good. There is space for dumping.

DUNCAN (Discovery).—It is about half a mile from Rocky Bar; has a tunnel about seventy feet in length.

EMILY ROSA (Discovery).—One thousand four hundred feet; is a short distance from Rocky Bar. The ledge is about forty feet wide. Croppings are very prominent. The ledge has been traced one thousand four hundred feet, and there is space for dumping.

ESMERALDA (Discovery).—The Esmeralda Ledge is situated on Bear Creek. Tunnel is one hundred feet; open cut, twenty feet. Ledge, at the end of tunnel, is about two feet, and has been traced one thousand feet westerly from tunnel. The walls are granite, and somewhat smooth.

EUREKA.—The above lode is situated in Blake's Gulch, has a tunnel on the north side of gulch which is ninety-five feet in length; the ledge two and a half feet wide; walls, or casings, are granite.

FLORIDA (Discovery) is one mile from Rocky Bar. The lode is two feet wide, and has space for dumping.

GOLDEN STAR.—The above ledge crosses the Confederate Star Tunnel about ninety-nine feet from entrance. Ledge is two and a half feet wide; it has been stoped about fifty feet in length and twenty feet in depth.

IDAHO (Discovery).—The above well-known ledge is situated north of Bear Creek; has a good tunnel, which is one hundred feet from the entrance to the turn-table—a point where the ledge was struck. It then follows the course of ledge one hundred feet on the south-west, and two hundred feet on the nort-east. There are five shafts, ranging from ten to one hundred and ten feet deep. Ledge is six feet wide, and well defined. It has been traced over one thousand two hundred feet. It is good quartz, and easily reduced. It contains some sulphates of iron, but not much has been found as yet. There is a good road to the mine, which is only a short distance from the mill. There is plenty of space for dumping.

LUCKY BOY.—The above ledge is one-fourth mile from Rocky Bar; has a tunnel ninety feet in length. Ledge is one foot wide, and has granite walls.

MALAKOFF TUNNEL is located on the south side of Blake's Gulch; tunnel ninety feet.

MARIPOSA is two miles from Rocky Bar; open cut fourteen feet; drift nearly twenty feet; ledge two feet wide, and has a good dump.

MASONIC.—The Masonic is about one hundred yards from Rocky Bar; has a tunnel twenty-four feet in length.

MAYFLOWER.—The Mayflower is one-half mile from Bear Creek; has a tunnel forty feet in length.

OLD OPHIR (Discovery).—The above ledge is situated at the head of Sawyer's Gulch, about two miles from Rocky Bar; open cut showing a three-foot ledge; very little granite in quartz; ledge is well defined, and has granite walls. Has space for dumping.

OLD OPHIR (Second Extension).—The second extension of the Old Ophir is located on Blake's Gulch, two miles north from Rocky Bar. There is an open cut extending fourteen feet on the ledge, show-

ing a lode two and a half feet in width, and good character quartz. The ledge is well defined, has been traced two thousand feet; and there is plenty of space for dumping purposes. A good road might be made to the mine with very little expense.

PENNSYLVANIA LEDGE is near Ophir Gulch, three-fourths of a mile; it has a tunnel one hundred feet in length, one shaft thirty-five feet deep; ledge is eighteen inches wide, and has granite walls.

PHŒNIX.—The above lode lies between the Idaho and Emmet.

SIERRA (Discovery).—Twelve hundred feet. Is on Quartz Hill; shaft is fifty-six feet deep, tunnel fifty feet in length; the ledge, at the bottom of the shaft, is about two and a half feet wide, and has granite walls.

VANDERBILT (Discovery).—Twelve hundred feet. Is situated on Silver Mountain, about two miles from Elk Creek; has a tunnel fifty feet long; ledge three and a half feet wide, and smooth granite walls.

WABASH.—The above ledge is on Bear Creek, about one-quarter of a mile above the Waddingham Mill. Tunnel is one hundred and and thirty feet; ledge is one foot wide, but said to be irregular and not well defined.

WILEY OPHIR.—The Wiley Ophir is one-half mile west of Elk Creek; it has a shaft about thirty-six feet deep. Quartz has been taken out of the mine for about thirty-six feet in length, and it is now stoped up.

BONAPARTE DISTRICT.

The above district is about eight miles south-east of Rocky Bar; it is well timbered and watered, enjoys good natural advantages for the development of its mineral resources. A good wagon road can be made to the mines at little expense. The following ledges are the best known.

BLUE LEDGE.—This ledge is located near the head of Cayuse Creek; shaft is six feet deep; runs north-east and south-west, and has granite walls.

BONAPARTE is a good ledge, and situated near the head of Cayuse

Creek; has a shaft eight feet deep. A tunnel has been run between the Bonaparte and some other ledges, which extends about ninety feet. The different lodes which run parallel with the Bonaparte, it is reasonably supposed from the way the ledges dip, will finally unite and form one ledge. The lode runs north-east and south-west, has granite walls, and space for dumping.

French Ledge is located near the head of Cayuse Creek; is six feet wide and has granite walls.

VOLCANO DISTRICT.

The above district is located at the south-west end of Big Camas Prairie; it is well watered, but deficient in timber; there is some to be had by hauling a distance of from eight to twelve miles. The country is well adapted for grazing, and the hauling of timber for milling and mining purposes can be done at comparatively little expense. The following ledges are in this district.

LEDGES.

Bancock Chief is about four miles from Volcano, and is a well-defined ledge, about six feet in width.

Bay State is one mile from Volcano, and has a shaft which has been sunk forty feet. The ledge is said to be twenty feet wide.

Empire State has a shaft twenty-five feet.

The Germania is a short distance from Silver Creek, and about three hundred yards from the Matilda. The Germania lode is fifteen feet wide.

The Matilda is about three hundred feet from Silver Creek; the ledge is about fifteen feet wide, and the croppings are prominent.

The Germania, Mammoth, and Matilda ledges are about three miles from Volcano.

Pioneer Ledge is about one mile and a half from Volcano, and has a shaft twenty feet deep.

Sigel Muller has a shaft about twenty-five deep.

The shafts which have been sunk on the different ledges in Volcano District are ten feet deep, just enough work having been done to represent and hold them.

YUBA DISTRICT.

Is situated about eighteen miles north of Rocky Bar, and, with the exception of Grouse Creek, and that part of the hill near Middle Boise River, east side of Atlanta Hill, and bordering on the west side of Quartz Gulch, and toward the Boise River, there is not much timber. There is plenty of water for milling purposes. Atlanta Hill runs from the head of Quartz Gulch, north-east, and south-west toward Middle Boise River. Quartz Gulch runs down toward Middle Boise River, on the west side, and Montezuma Gulch on the east.

LEDGES.

Atlanta (Second Extension).—This ledge is located on the east side of Quartz Gulch, is twenty-five feet wide, of which fifteen feet is decomposed, and ten feet is solid quartz; it is a good ledge. The walls are granite.

Atlanta (Discovery) is twenty yards west from Quartz Gulch; the tunnel is thirty feet in length.

Blue Nose is in Quartz Gulch; runs north-east and south-west, and has granite walls.

Eclipse (First Extension) is on the east side of Atlanta Hill; has a tunnel of twenty feet. The ledge is three feet wide, runs north-east and south-west, dips north, and has granite walls.

Gray Eagle (Discovery) is on Atlanta Hill, about one-half mile from the head of Quartz Gulch; it has a shaft twelve feet deep, runs north-east and south-west, and dips north.

Jessie Benton (Discovery) is on Atlanta Hill, about one-half mile from the head of Quartz Gulch, and has a shaft twelve feet deep. The ledge is four feet wide, runs north-east and south-west, and dips north.

Juno is located one mile from Middle Boise River; the ledge is about twelve feet wide, runs east and west, and has granite walls.

Leonora.—This ledge is located about one mile from Middle Boise River, and has two open cuts, of fifteen and twenty feet, respectively; the ledge is five feet wide, of a good character of quartz, well defined, runs north-east and south-west, has granite walls, and been traced two thousand feet. There are about fifty or sixty tons of quartz which has been taken out of the ledge.

Minerva is one mile from Grouse Creek; the ledge is fourteen feet wide, runs north-east and south-west, dips north, has granite walls, and space for dumping.

Olive Branch (Discovery) is in Minerva Gulch, about one mile from Grouse Creek; the ledge is twenty feet wide, about equally divided between solid and decomposed quartz, runs north-east and south-west, dips north, and has granite walls.

Olive Branch Extension is one mile from Grouse Creek, and has an open cut of twenty feet; the ledge is very wide.

Pacific (Discovery) is on the east side of Rabbit Gulch, south side of Quartz Hill, and has a shaft twenty feet deep; the ledge is twenty-five feet wide, runs north-east and south-west, dips north, and has granite walls.

Pacific (Second Extension) is thirty-five yards from Rabbit Gulch, on the south side from Quartz Hill, and has a shaft seven feet deep.

Phebe is about one mile from Middle Boise River; the ledge is four feet wide and has granite casings.

Silver Tide is on Atlanta Hill, one-fourth of a mile from Quartz Gulch; the ledge is four feet wide, runs north-east and south-west, and has granite walls.

RED WARRIOR DISTRICT.

LEDGES.

Brightsides.—The tunnel is one hundred feet in length. There is about sixty tons of quartz at the mouth of tunnel.

Charter Oak is about one-fourth of a mile from Red Warrior. Tunnel is eighty feet in length; ledge eighteen inches wide; mixture, some granite. Has space for dumping.

CHIQUITA is about one mile north of Red Warrior; has a shaft twenty-five feet, and a tunnel fifty feet in length.

FOURTH OF JULY is westerly from Red Warrior; has a shaft twenty-five feet deep, and tunnel twelve feet long. The ledge is two feet wide; mixture, a little granite. Has space for dumping.

GOLDEN EAGLE (Discovery) is about three hundred yards from Red Warrior; has a tunnel one hundred and twenty feet long, and a shaft forty feet deep. The ledge varies from twelve inches to three feet wide.

GOULD AND CURRY is on the north-east side of Red Warrior Hill; has a shaft thirty feet deep. The ledge is about six feet wide, and has space for dumping purposes.

HARD UP is south of Red Warrior. Tunnel is sixty feet long.

KNICKERBOCKER is one-half mile north from Red Warrior; has a tunnel one hundred and twenty feet in length, showing the ledge three feet in width at that point.

LIVE OAK is north-east of Red Warrior; has a shaft twelve feet deep, and space for dumping.

MOUNTAIN PRIDE.—The tunnel is seventy-six feet in length.

NELSON (Discovery) is north-west of Red Warrior; has a shaft twenty feet deep. The ledge is about seven feet wide.

SILVER STAR (1st East Extension) is half a mile from Red Warrior. Ledge is five feet wide.

NEW YORK is a short distance from Red Warrior; has a tunnel eighty feet in length, and a ledge from two to three feet wide. There is a good road to the mine.

RED WARRIOR GOLD MINING TUNNEL COMPANY is on the west side of Red Warrior Creek, about one-fourth mile from Red Warrior.

LIST OF LEDGES.

ABBREVIATIONS, ETC.—Disc., Discovery; Ex., Extension. The following ledges are recorded in the Recorder's office at Rocky Bar.

BOISE COUNTY.

QUARTZ MILLS.

Bibb, Jackson & Humason's Mills.—One is located on Grimes' Creek, the other on the divide, about twenty miles from Idaho City. The mill on Grimes' Creek has eight stamps, weighing five hundred and forty pounds each, and crushes eight tons in twenty-four hours. Machinery is in good order, and the mill is run by water; has a wheel thirty-two feet in diameter; three sluice-boxes, one of fifteen, and two of ten feet, respectively; two riffle-boxes, which are placed between the first and last two sluices. Expense of running the mill, eighteen dollars per day; cost of taking rock out of the mine, three dollars per ton, and the same for hauling it from the ledge to mill. Total, sixty-six dollars per day.

Cobden Mining Company.—D. Richardson, Superintendent. The Cobden Mill is situated on the west side of Moore's Creek, about five miles from Idaho City. Mill has twenty-five stamps, weighing six hundred and fifty pounds each, five batteries, four amalgamators, two separators, and five concentrators. The above kinds of machinery are on hand for the purpose of testing the different kinds of ores, and to ascertain the best process to work them. Engine, sixty-horse power;

boiler, sixteen, by forty-five in diameter. Dimensions of building: sixty-five by eighty-two feet; space occupied by machinery, thirty-seven by sixty-five feet. The building is substantial, and well adapted for the object for which it was built. The mill has been crushing rock taken from the Chickahominy Ledge.

Combs' & Co.'s Mill.—The mill owned by the above company is located on Illinois Gulch, about six miles from Idaho City. It has ten stamps, weighing six hundred and fifty pounds each—drop ten inches, and seventy-two times a minute. There are two batteries, one engine, thirty-horse power. Shoes and dies last about forty days—shoes weigh about one hundred pounds, and dies nearly sixty pounds. Number of hands employed: two engineers, two feeders, and two amalgamators, at an expense of nine hundred dollars per month, including board. There are sixteen ledge hands, who receive each six dollars per day. The mill consumes about three cords of wood a day, at an expense of five dollars per cord. Rock average forty-five dollars per ton. Number of tons crushed every twenty-four hours, twenty.

Elk Horn Mill Company.—Elk Horn Mill is located on Elk Creek, about eight miles from Idaho City. Has five stamps, weighing six hundred and fifty pounds each; drop nine inches, and seventy-five times a minute. Crushes ten tons a day, at a cost of four dollars per ton — timbering and working the ledge included. Machinery is in good order, and the general appearance of the interior of the mill is very good. Number of men employed, four. It is run by water, which is supplied by a ditch, and can supply about two hundred inches a day; number of inches now used, eighty-two a day. They use Friedenberg's Turbine Water-Wheel, which has a velocity of two hundred and sixty revolutions a minute. Rock is taken from the Elk Horn Ledge, near and convenient to the mill, which is about three hundred yards from Elk Creek. Rock prospects from thirteen dollars and twenty cents to thirteen dollars and sixty cents per ounce; average from six clean-ups, thirty-three dollars and fifty-seven and one-half cents per ton. Loss of quicksilver, about ten pounds per week.

H. H. Raymond's Mill.—Raymond Mill is about one and a half miles east of Centerville; has ten stamps, drop eight inches, and seventy times a minute, and two batteries. Has two Wheeler's Pans and Amalgamators. Rock pays about twenty dollars per ton; gold assays about thirteen dollars and fifty cents an ounce. Three men are employed in the mill, seven in the mine, and one man and a boy to

haul rock from the ledge to the mill. Cost of hauling rock from the mine to the mill, one dollar per ton. The men are paid three dollars per day and board. Rock is taken from the Allen Ledge.

Langdon Mill.—J. A. Middleton, proprietor. This mill will be in operation in the spring.

Middleton Mill.—J. A. Middleton, proprietor. The above mill formerly belonged to Crow & Hubble. It is about six miles from Idaho City; has ten stamps, weighing five hundred pounds each—drop ten inches. It is a steam mill, and will crush rock taken from the Buffalo and John L. Stephens ledges.

Union Gold Mining Company.—C. S. McAlpine Superintendent. The Collins & Holliday Mill is located on Ice-House Gulch; has twelve stamps; drop eight inches. It is a steam mill. Another mill belonging to the same company, called Gates' Mill; was made in Chicago, Illinois, and is situated about fifty yards west from Moore's Creek. Engine, fifty-horse power. The first mill is near to the following ledges, viz. United States, Monroe, Furnace, and Girard; the latter is close by the Astor Lode.

Van Wyck.—Van Wyck Mill has five stamps; drop eight inches, and seventy times a minute. Engine, twelve-horse power, and crushes about five tons in twelve hours. The above mill crushes rock from the Pomona and Van Wyck ledges. Prospects, fourteen dollars and twelve and one-half cents per ounce.

DITCHES.

Bannock Bar Ditch is owned by Marion Moore and Green White.

Buena Vista Bar Ditch is owned by Marion More and D. H. Alderson.

Centerville Ditch is owned by Mr. Woltrap.

Grimes' Creek Ditch supplies the mines from Pioneer City to Centerville; owned by Marion More and J. C. Smith.

Moore's Creek Ditch is owned by Christie & Houston.

Pine and Bannock Creek Ditch is owned by Marion More and D. H. Alderson.

PLACERVILLE DITCH is owned by Messrs Lynch & Clayton.

UPPER CREEK DITCH commences six miles from Alderson's Ditch, and runs on the divide between Centerville and Idaho City. A. W. Morton & Co., proprietors.

LEDGES.*

ALLEN (Discovery).—The above ledge is about one and three-fourths miles from Centerville; has a tunnel ninety feet long, which follows the course of the lode, showing it to be from three to six feet wide; is sloped about fifty feet, and from ten to twenty-five feet of the quartz has been taken out. The ledge runs north-east and south-west, dips south, and has granite walls. There is an inclined shaft about fifty feet deep, which presents a workmanlike appearance, and is the best one in Boise County.

ASTOR (Discovery).—Eighteen hundred feet. The above ledge is about one-fourth mile from Moore's Creek, and six and a half miles from Idaho City; has two tunnels; the upper is ninety feet, lower forty-eight feet from entrance and forty feet open cut. Ledge, near the surface is four feet, wide, and in the tunnel six feet. It has space for dumping. There is a good road to the mine.

BANNER (Discovery) is on Illinois Gulch, about five miles from Idaho City; has a tunnel sixty feet; runs north-east and south-west, and dips south.

BUFFALO.—The Buffalo is in Deer Creek District; is said to have two shafts. The first is one hundred and sixty-two feet, second is sixty-two feet deep. Ledge is five feet wide.

CAMANCHE (Discovery).—One thousand two hundred feet. It is on the west side of Granite Creek, in Granite Creek District; has a tunnel about fifty feet.

CENTERVILLE.—Is about one mile and a half from Centerville; has a shaft about sixty feet deep. Ledge, two feet wide; runs north-east and south-west, and dips south.

CHICKAHOMINY (Discovery).—The above ledge is one and three-fourths miles from Moore's Creek; has a tunnel one hundred and

* The ledges in Boise Basin are situated in a well-timbered region, and there is plenty of water in Grimes, Elk, and Moore's creeks for milling purposes.

eighty-seven feet from mouth, and forty feet open cut. The ledge is from four inches to four feet; has smooth granite walls.

Elk Horn.—The Elk Horn Ledge is located about three hundred yards west from Elk Creek, and fourteen miles from Idaho City; has two tunnels of two hundred and twenty feet, respectively. It is a good ledge, and ranges from eighteen inches to six feet; runs north-east and south-west, and has granite walls.

Garrison Gambrinus.—The above ledge is about seven miles from Idaho City. Ledge is about three or four feet wide; runs north-east and south-west, and dips south.

Illinois.—The above ledge is situated on Illinois Gulch, near to a mill of the same name. It has a tunnel two hundred and ten feet, which follows the course of the ledge and is about seven feet wide, showing good quartz and good facilities for working it. The first shute or mill is five feet from the mouth of the tunnel and forty feet; the second is ninety feet from the entrance and sixty feet. One hundred and twenty feet from the mouth of the tunnel a place has been prepared for the purpose of sinking an incline-shaft; tunnel is here about seventy feet below the surface. The upper tunnel is about one hundred feet; part of it is an open cut. The south wall is smooth and the north moderately uneven. There is a wagon-road to the mine from Idaho City, and the Illinois Mill is near to mine.

John L. Stephens is about eight miles from Idaho City; has a shaft which is said to be one hundred and thirty-eight feet deep.

King Bee (Discovery) is on Summit Flat; has a tunnel about ninety-six feet.

Mammoth.—The above ledge is in Summit Flat District, about nine miles from Pioneer City, one-fourth mile east of Grimes' Creek, and three-fourths of a mile from mill. It has a tunnel one hundred and fifty feet long; is a good ledge, and ranges from two to three feet wide.

Pioneer (Discovery).—The above ledge is in Granite Creek District, on the east side of Granite Creek; has a shaft about thirty-six feet deep, and a tunnel ninety feet in length.

Pomona (Discovery) is about one and one-fourth miles from Centerville; has a tunnel about forty feet in length; shaft and open cut,

twenty-five feet. Ledge ranges from eighteen inches to two feet wide; runs north-east and south-west, and dips south.

QUINCY is on Red Warrior Hill; has a tunnel twenty feet in length.

RICHMOND is a short distance from Red Warrior; has two tunnels—one is twenty-five feet long, and the upper tunnel is eighty feet. The ledge ranges from six inches to three feet. There is a good road to the mine.

SPECIMEN (Discovery) is on Summit Flat; has two shafts; one is twenty and the other seventy-two feet deep.

UNION is north of Red Warrior; has a tunnel one hundred and twenty feet long.

UNITED STATES (Discovery).—The above ledge is on Ice-House Gulch, and about six miles from Idaho City; has a tunnel eighty feet long; open cut, twenty feet; runs north-east and south-west, and dips south.

WEBSTER.—Webster Lode is situated on Red Warrior Hill; has a tunnel twenty feet long; ledge is three feet wide; mixture, six inches granite. There is space for dumping.

WILD CHERRY (Discovery).—The above ledge has a shaft twenty feet deep; ledge, eighteen inches wide; runs north-east and south-west, and dips south.

WIDE WEST.—The Wide West Ledge has a tunnel about one hundred and twenty feet. The ledge is four and a half feet wide on the surface. It has granite walls.

YOUNG EMIGRANT is half a mile from Red Warrior. Shaft is ten feet deep. Ledge, two feet wide, runs north-east and south-west; dips north, and has granite walls.

SILVER HILL DISTRICT.

LEDGES.

ABE AND ANDY has a shaft twenty-five feet deep, and a tunnel fifty feet long; the ledge is five feet wide, with a mixture of granite, runs north-east and south-west, and dips north.

AMERICAN STAR is on Banner Hill; has two shafts, twenty and thirty feet deep, respectively, which are connected by a tunnel forty feet long; the ledge runs north-east and south-west, dips south, and has granite walls.

ARCHER (Discovery).—This ledge is located near Mineral Gulch, about four miles from Payette River; its course is north-east and south-west, and has been traced two thousand feet.

ARCHER (First North-East Extension); distant from Payette River about four miles; the ledge is two feet wide, extends north-east and south-west, and dips nearly perpendicular.

BANNER (Discovery).—This ledge is located on Banner Hill; has a shaft thirty-five feet deep, with tunnel, including cut, of about three hundred and fifty feet; it is a good ledge, two feet wide, runs north-east and south-west, and dips south. There are two ledges crossing the tunnel; one is one hundred and forty-five feet from the entrance, and is about three feet wide; the other two hundred and twenty feet, eighteen inches wide, and there is a good dump. About twenty tons of quartz near the mouth of the shaft.

CHEROKEE is on Banner Hill; has a shaft twenty feet deep, ledge two feet wide, granite walls, runs north-east and south-west, and dips south.

HIGHLAND is on Banner Hill; has a shaft twenty-five feet deep, ledge twelve inches wide, runs north-east and south-west, and dips south.

LINCOLN has a shaft thirty-five feet deep, tunnel sixty feet in length, and the ledge runs north-east and south-west.

STAR OF THE WEST has an open cut twenty feet long.

UNCLE SAM.—This ledge is situated on Banner Hill; has a tunnel ninety feet long, ledge four feet wide, runs north-east and south-west; the wall on the north side is granite, on the south slate; there is space for dumping.

WASHOE (Discovery) is on Victoria Hill; has an open cut of eight feet, runs north-east and south-west, dips north, and has smooth granite walls.

WOLVERINE (Discovery).—This ledge is located on a hill of the same name; has a tunnel about one hundred feet in length, has space for dumping, and good facilities for working.

WOLVERINE (First Extension) is on Wolverine Hill; has a tunnel three hundred feet long, shaft and open cut eighteen feet deep, runs north-east and south-west, and has space for dumping.

SILVER MOUNTAIN DISTRICT.

LEDGES.

ELEPHANT (Discovery) is located on the west side of Pike's Fork, one mile south of Forest City; it runs north-east and south-west, and dips north.

GENERAL CONNOR (Discovery).—This ledge is situated on the west side of Pike's Fork; has an open cut about twenty-five feet in depth and about forty in length; the ledge is about ten feet wide, runs north-east and south-west, dips north, the wall on the north side being slate, and on the south granite; there are about one hundred and fifty tons of quartz at the entrance of open cut.

PENNSYLVANIA (Discovery).—This ledge is on Alma Mountain, about one-third of a mile east of Crooked River; it has an open cut of eight feet; the ledge is eight feet wide, runs north-east and south-west, dips north, has slate walls, and is well defined.

LIST OF LEDGES.

ABBREVIATIONS, ETC.—Disc., Discovery; Ex., Extension. The following ledges are recorded in the Recorder's office at Idaho City.

OWYHEE COUNTY.

BOUNDARIES OF MINING DISTRICTS IN OWYHEE COUNTY.

Carson District, commences from the top of War Eagle Mountain, runs west seven or eight miles, north and south about fifteen miles.

Flint District is about ten miles south of Ruby City.

French District, commences on the divide of Oro Fino, or War Eagle Mountain, runs eastward toward Snake River, and southerly and northerly about twelve miles.

Mammoth District is about twelve miles south-west of Ruby City. The ledges vary from eight to thirty-two feet wide.

Steel District is about eight miles from Ruby City, and adjoins French District.

QUARTZ MILLS.

Ainsworth Mill is on Sinker Creek, about seven miles east of Silver City, and has ten stamps.

Cosmos Mill.—Cosmos Silver Mining Company, New York; E. H. Dewey, Superintendent. The Cosmos Mill is on Jordan Creek, one-fourth mile from Silver City; has twenty stamps, weighing six hundred pounds each; four batteries, six pans; engine, thirty-five-horse power. Machinery was made at the Miners' Foundry, San Francisco.

Jackson Mill.—J. S. Martin, Superintendent, is on Jordan Creek, near Silver City; has five stamps, weighing five hundred and fifty pounds each; drop eight inches, and seventy times a minute; one battery, two amalgamators; engine, thirty-horse power, consumes four cords a day; crushes eight tons a day; rock taken from the Oro Fino Mine. The above is a custom mill, and is leased by More & Fogus. Machinery was made in Portland.

Lincoln Silver Mining Company.—John A. Coleman, Superintendent; C. F. Balcom, Agent. The above mill is located on the west side of Golden Creek, between Ruby and Silver cities; has twenty stamps, weighing six hundred pounds each; four batteries, ten pans; engine, fourteen-inch cylinder and thirty-inch stroke. Machinery was made at the Miners' Foundry, San Francisco.

Minear Mill.—J. S. Martin, Superintendent, is on Jordan Creek,

about one mile from Silver City; has five stamps; drop eleven inches, sixty a minute; one battery, two amalgamators; engine, thirty-horse power; crushes nine and one-half tons a day; consumes two and a half cords, at a cost of eight dollars per cord. It is a custom mill, and leased by More & Fogus. It crushes rock from the Oro Fino Mine. Machinery was made in Rochester, New York.

More & Fogus Mill.—More & Fogus, proprietors; H. R. Carter, Superintendent. The above mill is on the east side of Jordan Creek; has eight stamps, weighing seven hundred pounds each; drop from eight to ten inches, and eighty times per minute; has two batteries and four Wheeler's Pans; engine is thirty-horse power. Mill crushes rock taken from the Morning Star and Oro Fino ledges, which belong to the proprietors of the mill. The number of tons crushed a day are: Morning Star, twelve to fourteen; Oro Fino, sixteen to twenty. Average paying quality of rock: Morning Star, two hundred and thirty-five dollars per ton; Oro Fino, one hundred and eighty-five dollars per ton. Number of men employed in the mill, eight—four on a shift of twelve hours each. Amount of wood consumed a day, three cords, at a cost of six dollars and fifty cents per cord, delivered at the mill. Machinery was made at the Miners' Foundry, San Francisco.

New York and Owyhee Gold and Silver Mining Company.—Robbins & Styles. The above mill is located at East Ruby, on the east side of Jordan Creek, opposite Ruby City; has twenty stamps, weighing six hundred and fifty pounds each; capacity for thirty. There are four batteries, ten amalgamators, four separators; engine, eighty-horse power; intend crushing rock from the Minnesota, Columbia, or Oro Fino and Hays & Rey. Machinery was made at the Pacific Foundry, San Francisco.

Quartz Mill.—There is machinery for a new mill, which will be in operation an an early day. It is located on Sinker Creek, about six and a half miles from Silver City. A. N. Grenzebach, Superintendent.

Shoenbar Mill.—John Shoenbar, proprietor. The above mill is on the west side of Jordan Creek, one-half mile from Silver City. It has ten stamps, weighing six hundred and sixty pounds each; drop from nine to ten inches; has two batteries and eight amalgamators; engine, twenty-five horse power. It is a custom mill; consumes three cords in twenty-four hours; cost from six dollars and fifty cents to eight

dollars and fifty cents per cord. An assay office is attached to the mill. It is a stone building, and the only mill made of that material in the Territory; its dimensions, seventy by sixty-four feet. Cost of mill, one hundred thousand dollars.

VASS & MORSE MILL.—Vass & Morse, proprietors. Mill is on the east side of Jordan Creek, in Silver City; has four stamps, weighing one hundred and forty pounds each; drop eight inches, ninety-three a minute; one battery, two pans; engine, eight-horse power; crushes two and a half tons a day; mill consumes five-eighths of a cord in twenty-four hours, at a cost of seven dollars per cord. Number of men, four; twelve hours alternately. Machinery was made in Portland, at a cost of six thousand dollars. It is a custom mill.

LEDGES.

COLUMBIA is on Oro Fino Mountain; has a shaft thirty feet deep; ledge is fifteen inches wide; average width, thirteen inches, and nearly two feet at the bottom of the shaft. It runs north and south; dips east; has granite walls, which are rough and uneven, and space for dumping. There is a road from the mine to Silver and Ruby cities.

EMPIRE (Discovery) is on Silver Mountain, about one mile and three-fourths from Silver City; has a shaft fifty feet; runs north and south, dips east; has granite walls and space for dumping.

HAYES & REY, (Discovery) sixteen hundred feet; is on the west side of War Eagle Mountain, about two miles from Silver City. Discovery shaft is twenty, middle twenty-two, and the upper twenty-eight feet; tunnel is seventy feet, running in on the ledge, which varies from eight inches to one foot wide; runs north and south, dips east; has granite walls, which are rough and uneven; there is space for dumping.

HOME TICKET TUNNEL.—Maj. Downie, proprietor.

MENYTANETE is on Oro Fino Mountain, has a shaft thirty-two feet deep; ledge is about three feet wide, runs north and south, lays nearly perpendicular; there is forty tons of quartz near the shaft.

MINNESOTA is on War Eagle Mountain, three and a half miles from Sinker Creek; has a shaft fifty-seven feet deep, drift twelve feet from bottom of shaft. Ledge two and a half feet wide, runs north and

south, and lays nearly perpendicular; has granite walls, and there is space for dumping purposes.

Morning Star.—This well-known ledge is a short distance from Silver City, and about two hundred yards from Jordan Creek; has a shaft one hundred and fifty feet deep, at the bottom of which a drift extends over three hundred feet. Ledge is about four and a half feet wide, and the quartz very rich; runs north and south; lays perpendicular; has granite walls, which are rough and uneven; space for dumping, and there is a good road to the mine.

New York is on War Eagle Mountain, about fifty yards west of the Oro Fino; shaft sixty feet deep. Ledge is twelve inches wide, runs north and south, lays perpendicular, and has granite walls.

Oro Fino (Discovery) is situated on Oro Fino Mountain, two and a half miles from Silver City and four miles from Sinker Creek; has a tunnel five hundred and seventy-five feet in length, which is the longest tunnel in any mine in Idaho Territory. There is a shaft at the end of the tunnel, one hundred and eighty feet deep, which goes down on the ledge and connects with the tunnel. The mine has been stoped about one hundred feet from near the entrance to the surface, and an open cut, about eighty feet long, has been stoped to the depth of twenty feet. The Oro Fino Ledge varies from twelve inches to seven feet; average width, from three and a half to four feet; has a mixture of a little granite, with some talc, which generally runs at the sides, center, etc. The talc, when broken, oftentimes discloses rich and beautiful quartz in and around it; sometimes it runs into the granite walls, showing free gold in places. The walls are rough and uneven; scarcely any part of them presenting a smooth appearance. Ledge runs north and south, lays perpendicular, and there is space for dumping. The quartz is taken from the mine in cars, and dumped near the mouth of the tunnel. The facilities for working the mine are very good; distance by a good wagon road from the mine to the mill, two and a half miles.

Oro Fino (Fourth Extension) is on Oro Fino Mountain; has a shaft thirty feet deep; runs north and south, dips east; has granite walls. There will be a double shaft, which when completed will have a partition, and be eight by four.

Poorman (Discovery).—This well-known ledge is about one mile and a half from Silver City, and nearly the same distance to Jor-

dan Creek; has a shaft twenty-seven feet deep. There is a drift extending one hundred and twenty-five feet from the shaft, from which vein stone has been taken out to the depth of twelve feet. Twenty-five feet on the south has been filled up, making a total of one hundred and fifty feet. It is a good ledge, and varies from six inches to three feet; average width of ledge, twenty inches—at the bottom of the shaft, three feet. Mixture, only one place in the mine, three feet in extent—a small quantity of granite; has granite walls, which are rough and uneven; runs north and south, dips west, and has space for dumping. There is a wagon road to Sinker Creek.

Silver Chord is on Wades' Gulch; has a shaft twenty feet deep. Ledge two feet wide; runs north-west and south-east, dips east; has granite walls, and space for dumping.

Silver Legion (Discovery) is on the west side of the War Eagle Mountain, one mile from Jordan Creek; has a shaft one hundred and fifty feet deep, and tunnel thirty feet long.

Silver Legion (First South Extention) is on War Eagle Mountain, two and one-fourth miles from Silver City; has a shaft eighteen feet deep; ledge is about three and a half feet wide; runs north-west and south-east, lays nearly perpendicular; has granite walls, and there is space for dumping.

Sterling (Discovery) is on Jordan Creek, one-half mile below Ruby Creek; open cut, eight by four feet; ledge, three and a half feet wide; runs north-east and south-west.

Stonewall Jackson (Discovery) is on the south side of Purdy's Gulch, about three and three-fourths miles from Sinker Creek; has a shaft fifteen feet deep. Ledge runs north-west and south-east; croppings are prominent on the top of the hill and near the shaft. There is space for dumping.

Trook and Jennings is located on War Eagle Mountain, one-half mile from Jordan Creek, and four hundred feet from Flint Gulch; it has two shafts; discovery shaft is seventy-five feet deep, and there is a drift extending from the bottom of the shaft twelve feet; second shaft is twenty-five feet deep. It is a good ledge, varies from ten inches to three feet wide, with smooth granite walls, runs north-west and south-east, and dips north. There is a road from the ledge to mills on Jordan Creek.

VIRGINIA (Discovery) is one mile from Silver City; has a shaft thirty feet deep, runs north and south, dips east, and has space for dumping.

VULCAN is on a branch of Wade's Gulch; has a shaft ten feet deep, runs north-west and south-east, has granite walls, and space for dumping.

FLINT DISTRICT.

LEDGES.

BOYD & KELLER (Discovery) is on Rising Star Hill, about four and one-half miles from Boulder Creek; has an open cut of five feet, ledge six feet wide, mixture, sulphurets, runs north and and south, dips east, has granite walls, and space for dumping. There is about fifteen tons of quartz near the mine.

ECLIPSE (Discovery) is on Rising Star Hill, about one mile from East Creek; it runs north and south.

ECLIPSE (Second South Extension) has a shaft twenty-seven feet deep.

EXCELSIOR (Discovery) is about one mile from East Creek; runs north and south, dips east, and there is about twenty tons of quartz near the mine.

JOHN JACOB ASTOR.—The ledge is about eighteen inches wide; runs north and south, dips east, and there is ten tons of quartz near the mine.

LEVIATHAN (Discovery) is on Rising Star Hill; has a shaft ten feet deep, ledge six feet wide, mixture, sulphurets, runs north-east and south-west, has granite walls, and croppings are prominent; there are twenty tons of quartz near the shaft, and space for dumping.

MY MARY ANN (Discovery).—The ledge is twelve inches wide, runs north and south, and dips east.

METROPOLIS (Discovery) is on Rising Star Hill, one mile from East Creek; has an open cut, and shaft about forty-two feet deep; in drift, ten feet from the bottom of shaft, the ledge is four feet wide.

Polar Star is about one mile and a quarter from East Creek; the ledge is five feet wide, runs north and south, dips east, and there is about twenty tons of quartz near the mine.

Pompeii is about one-fourth mile from Flint Gulch; has an open cut eighteen by twenty feet, ledge six feet wide, mixture, sulphurets, runs north and south, dips east, and croppings are prominent.

Rising Star (North Discovery) is on Rising Star Hill, about one mile from East Creek; has a shaft thirty-five feet deep, open cut of ten feet; average width of ledge about seven feet, runs north and south, dips east, is well defined, croppings are prominent; the ledge has smooth granite walls, and there is about two hundred tons of quartz near the mine, and space for dumping purposes.

Rising Star (South Discovery) is about one mile from East Creek; ledge seven feet wide, runs north and south, and has granite walls; there is about one hundred tons of quartz at the mine, and space for dumping.

Rising Star (First South Extension) has a shaft forty-two feet deep, and is a short distance from East Creek.

Rochester is on Owyhee Hill, about one-fourth mile from Flint Gulch, and has a shaft eighteen or twenty feet deep; the ledge is about twelve inches on the surface, and nearly four feet at the bottom of the shaft, runs north-east and south-west, dips east, and there are fifteen tons of quartz at the mine.

Twilight is on Twilight Gulch, about one-fourth of a mile from East Creek; has an open cut twelve by thirty feet, ledge twenty inches wide, runs north and south, dips east, has granite walls, and there is space for dumping.

LIST OF LEDGES.

Abbreviations, Etc.—Disc., Discovery; Ex., Extension. The following ledges are recorded in the Recorder's office at Ruby City.

GOOD WORK, PROMPT DELIVERY, AND LOW PRICES GUARANTEED.

A. S. HALLIDIE & CO.

Wire Rope Manufacturers,

No. 412 CLAY STREET,

SAN FRANCISCO.

Mining Companies and others using rope, are informed that wire rope is much STRONGER, MORE DURABLE AND VERY MUCH CHEAPER than any other kind of rope, and it is not affected by atmospheric changes.

We manufacture of every length and size,

ROUND WIRE ROPE

Of IRON and STEEL, for Hoisting purposes, Ferry Ropes and Derrick Guys.

STEEL WIRE ROPE,

For small Gear and for DERRICK FALL ROPES, very durable and light, with suitable Blocks.

FLAT WIRE ROPE,

For Hoisting from Mines. Small Sizes for Pump Belts.

GALVANIZED IRON WIRE ROPE,

For Stays and Guys.

IRON AND COPPER WIRE CORD,

For Hanging Window Sashes, Signal Cords, etc.

☞ And would refer to the many Companies who are using our Ropes throughout California and the adjoining States.

LISTS OF PRICES, with lengths, etc., forwarded on application to the manufacturers.

A. S. HALLIDIE,

CIVIL ENGINEER,

No. 412 Clay Street, San Francisco.

Wire Suspension Bridges and Aqueducts constructed by contract or otherwise. Permanency guaranteed. Material always on hand.

LEFFEL'S

American Double Turbine

WATER WHEEL

Is now manufactured by the Oregon Iron Works in the City of Portland, and orders for the same can be filled immediately. We have a small supply of the different sizes, from 10 inches to 48 inches in diameter. That we may know the proper sized wheel you require, measure your water in the following way: Take the width of the stream, the average depth, and the distance it flows in a minute.

All the wheels now in use give universal satisfaction. Both the construction of the wheel and its performance commend it to the better judgment of all minds capable of appreciating the highest development of mechanical construction. Therefore, it has conquered the most violent opposition.

This wheel is especially adapted to mining purposes. It is light, and can be easily packed into the mountains. Wheels weighing from 100 to 300 pounds will yield from 10 to 40 horse power, under a head of 25 or 30 feet. They are the cheapest wheels to set up known, as they are so arranged as to produce the greatest power possible from the water used.

These wheels are adapted to any quantity of water and any fall—from 24 to 5,000 inches miners' measurement, or from 4 feet to 500 feet fall. All we want to know is, what is the quantity of water you have either in miners' inches or cubic feet per minute, and the height of fall and horse power you require.

The prices of these wheels have now been reduced to the ability of all. Come and see them or send for circular to

BABBITTONIAN PENMANSHIP.

1.—A *Self-Teaching* system, having such full explanations of the right and wrong forms of letters on the backs of the copy slips, that any industrious learner may sit down by his own fireside and make a finer penman at $1.50, than he could by paying from $5 to $25 to most living teachers.

2.—There is a very great demand for fine *Business Penmen,* and a skillful command of the pen, which is worth hundreds of dollars to a business man, may be imparted through this system at a cost of only $1.50.

3.—Penmanship is almost an indispensable accomplishment for *Ladies,* and this system furnishes an elegant series of copies in the ladies' style.

4.—Business men have sometimes lost thousands of dollars from ignorance in regard to *Business Forms.* One dollar and fifty cents spent for these copies, will secure a fine variety of business forms and abbreviations.

5.—Babbittonian Penmanship is a great boon to *Schools,* being a great saving of TIME and LABOR to teachers, and of EXPENSE to students. In a large city school, it is found, by careful computation, that hundreds of dollars may be saved in a single year, by adopting these copies and using foolscap, in the place of buying the costly twenty cent copy books. A great advantage also is, that these copies are SELF-EXPLAINING, which feature is entirely wanting in most copy books. They are printed on card-board slips, so as to be durable. Splendid inducements offered to schools or clubs.

The progress of this system in schools, as well as among private learners, has been truly remarkable.

BABBITTONIAN PENS.

The Babbittonian Extra Fine Pen has been pronounced by a large number of elegant penmen, who are the only true judges, to be more FREE, more DURABLE, and more varied in capacity for either fine or coarse strokes, than any foreign pen whatever. It is suitable for elegant writing, and is a great favorite both with ladies and gentlemen.

The Babbittonian Business Pen is believed to be unequalled for general business or school use, having great freedom and variety of movement. Being somewhat coarser than the Extra Fine, it will move more easily on hard surfaces, and will wear somewhat longer.

The Babbittonian Ladies' Pen is one of the most exquisite little instruments for delicate writing ever constructed.

One reason why the country is so flooded with poor pens, is that they have generally been made by mechanics rather than by good penmen, who are the only ones that really understand the requirements of a good pen. As the above pens have been made according to the order of an old experienced penman, it is believed that they will be found admirably adapted to meet the public wants, or at least what the public OUGHT to want.

Terms, Post paid to any Part of the Union:

For Thirty-Six Pens, ... $0 50
For One Gross, ... 1 50
For Seventy-Two Pens and the System of Babbittonian Penmanship, 2 00

"We have thoroughly tested the Babbittonian Pens, and find them the best and cheapest in use."—HODGES' JOURNAL OF FINANCE, N. Y.

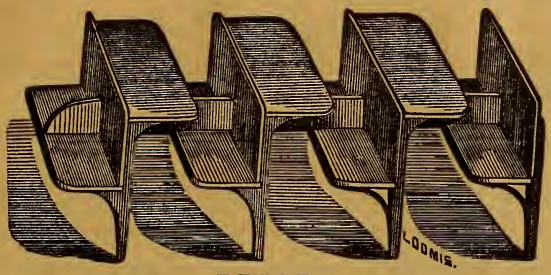
305 MONTGOMERY ST., SAN FRANCISCO, CAL.

NEW IMPROVED SCHOOL DESK.

Patented February 18th, 1862, by J. S. Rankin.



PRICES.

Redwood, with Ink-Wells	$6 00	Single Desk and Chair, Iron Stands	$6 00
Spanish Cedar	8 50	Blackboards, Slate Surface, per foot	25
Teacher's Desk, Spanish Cedar	25 00	Liquid Slating, per quart	2 50
School Settees, per foot	80		

By the arrangement represented above, two, three, or more School Desks are connected by a longitudinal beam or board, and firmly held together. The following advantages are claimed for this arrangement:

1. The series of Desks thus formed stand very firm on the floor, without being in any manner fastened to it.
2. They can be removed at pleasure by adults, in a few minutes, with little or no expense.
3. They present fewer obstacles to the use of the broom than any other Desk in use.
4. They furnish much less occasion for noise than any other School Desks, by presenting less surface for the feet to strike against.
5. They are superior, also, to other Desks, in regard to the convenience of getting in and out of them with ease.
6. In appearance they are neat, and, when properly made, even elegant.
7. The central longitudinal beam separates the two scholars in each Desk, thus giving to the arrangement one of the principal advantages claimed for single Desks.
8. They are simple in construction, and easily made "AT HOME" by any good workman; put together with screws, can be taken apart and boxed.
9. They can be more easily adapted to peculiar tastes and circumstances, as regards hight of seat and writing-board, inclination of the seat back, etc., than any Desk that is supported by castings.
10. They are *firmer* and *more durable* than Desks that require to be fastened to the floor by nails or screws.
11. They are much cheaper than any other Desk—costing, ordinarily, not more than half as much.

That these statements are true, will, it is believed, be apparent to teachers and others who have had much experience in using and furnishing school-rooms; and, if they are true, it is equally plain that the advantages obtained by this arrangement are very great, and that it has good claims to the notice and favor of all who may desire to assist in improving the appearance of our school-rooms, and promoting the comfort of the pupils and teachers.

These desks are now in use in the following named Schools, and give perfect satisfaction: Grace Female Seminary, Miss Butler's Seminary, Mrs. Varney's School, St. Mary's College, Mission School, Protestant Orphan Asylum, Asylum for the Blind, San Francisco; Pacific Female College, Oakland; College at Vacaville. Also, in the following Public Schools: Oakland, Brooklyn, San Lorenzo, Pacheco, Napa, Sonoma, Sacramento, Washington, Nicolaus, Placerville (Private and Public Schools), Cold Springs, Mud Springs, Sonora, San José, Santa Clara, San Mateo, Alviso, Monterey, Virginia City, and Mokelumne Hill.

The Desks, or the right to use the invention will be furnished on very favorable terms. Address **WARREN HOLT,**

305 Montgomery Street, Room No. 2, San Francisco.

ANNUAL REPORT

OF THE

Pacific Insurance Company.

In compliance with the Act of the Legislature of the State of California, entitled "An Act concerning Corporations," passed April 22d, 1850, the Pacific Insurance Company of San Francisco makes the following Annual Report:

I.—The amount of the Capital Stock of this Company is *Seven Hundred and Fifty Thousand Dollars,* and paid in GOLD,.....$750,000

II.—The amount of the Assets is *One Million and Fifty-one Thousand, Four Hundred and Twenty Dollars and Thirty-seven Cents,*.....$1,051,420 37

III.—The Company has *no Debts.*

IV.—The amount of Insurance effected during the year, and which remained in force December 31st, 1865:

Fire,.....$12,973,949
Marine,..... 484,408

This Company commenced underwriting Marine Risks, August 1st, 1865.

V.—This Company insures against the following risks, viz.: **Buildings, Household Furniture, Merchandise, Rents, Leaseholds, Vessels in Port and their Cargoes, and other Personal Property,**

AGAINST LOSS OR DAMAGE BY FIRE.

Also, on **Cargoes, Treasure, Commissions, Profits, and War Risks,** and on **all Marine and Inland Navigation Risks, to and from all Ports in the World.**

VI.—This Company will take on any **First Class Risk** not to exceed $75,000, (the limit fixed by law); and on all large risks will reinsure, to an extent consistent with **Prudence, in other responsible Companies.**

THE EXCELSIOR

Grinder and Amalgamator.

In the engraving herewith presented, A represents the Rim of the Pan; B, Muller; C, Legs; D, Cross-Frame; E, Gearing; F, Screw; G, Lever; H, Dash-Boards; I, Key; *a*, Dies; *c*, Shoes; and *o*, Openings.

The relative grinding capacities of "The Excelsior" Grinder and Amalgamator, of the Flat Bottomed Pan, and of the Conical Pan *when properly constructed*, are respectively 177, 98, and 110.

That is, the respective mullers being of the same diameter, same weight, same hardness, and running at the same velocity, "The Excelsior Grinder and Amalgamator" will reduce one hundred and seventy-seven tons of ore, the Flat Bottomed Pan ninety-eight tons, and the Conical Pan one hundred and ten tons, to the same degree of fineness in the same time.

The wear to the Shoes and Dies at their grinding surfaces, in "The Excelsior Grinder and Amalgamator," is perfectly uniform, thus securing evenness of reduction to the pulp, as well as steadiness of motion to the muller. Uniform wear of the grinding plates has been attained in no other than that of the tractory form—nor can it be.

Another property of excellence in this machine is, that the metal or substance to be amalgamated passes DIRECT from the grinding surfaces into the quicksilver; thus excluding the possibility of its becoming coated with any foreign substances after having been burnished. It is truthfully said, that "the tractory-formed pan as a grinder has no equal, and as an amalgamator no superior."

As a whole, it is far superior to any other pan in use.
